**Subject:** Utah Div of Wildlife Resources - Kingston Canyon Rock - S/031/009

We received a new notice from a sister state agency (Division of Wildlife Resources) for a mining project in Piute County;  
SE1/4 NW1/4 SE1/4, Section 16, T30S, R2.5W.

The notice said they had a qualified archaeologist, Kathie Davies, who works for DWR has conducted a field survey and determined that no archaeological, historical or cultural resources exist and none will be impacted. A letter requesting written approval and clearance to collect rock has been submitted to SHPO. Work will not begin prior to approval by SHPO.

Therefore, we will not be sending you the notice - since you already have an application from the operator themselves.

This is just a courtesy notification from us to you.

Joelle
